The Aurena Family of Over-The-Counter Products

---

# Demand for over-the-counter products continues to increase

- The global over-the-counter (OTC) market continues to grow. Key factors contributing to this growth include:
  - More cost effective for users and the healthcare industry
  - A trend to move from prescription category to OTC category as part of product lifecycle management
  - Many consumers prefer OTC products because of their easy availability and to avoid visiting a doctor

# When a consumer is looking for your OTC products, does it stand out from the rest?

Creative packaging, labelling and displays make your brand stand out from the rest and improves the shopping experience.

Worry free application thanks to guaranteed sterility, no rub, no sting, no chill and proven effectiveness.

Conveniently spray at any angle, and take the product anywhere without worrying about leakage, then recycle when finished.
